Dear Robin and  
Shixia,

Attached are the spreadsheets containing the individual values for nictotine and metabolites for the cross validation with Covance. I apologize for not getting them to you sooner. There is a spreadsheet for each analyte that contains a page with the individual values and a page with the mean values.  
Please let me know if you need any other information for the data review.

I will be out of town on Monday so I will miss our analytical call. Kirk will be here and will call in.

Have a nice weekend!
